

I oppose any effort to limit what satellite radio can broadcast. The reason I pay for satellite radio is because my local broadcasters provide sub-standard programming. I do not like to be yelled at by rednecks and lunatics, therefore I choose not to listen to local radio broadcasters. Please reject any FCC petitions or legislation that would limit what satellite radio providers can broadcast. If I don't like their programming, I will simply spend my dollars elsewhere. Let me vote with my checkbook.Regards,
Amy Anderson
